

Triplicates verses non triplicate refills:

The following medications are considered Triplicates and have special guidelines:

- **Adderall and Adderall XR**
- **Focalin and Focalin XR**
- **Ritalin and Ritalin LA**
- **Methylin**
- **Metadate CD**
- **Concerta**
- **Vyvanse**
- **Daytrana**
- **Dexedrine**

These medications can not be called in and must be picked up or mailed. They will expire seven days from the date the prescription was written and must be filled before then. If they expire, the pharmacy has up to 21 days to call us for a verbal date change, otherwise a new script must be written. There is a \$10.00 charge for all triplicates written outside of an appointment. Please sign up for your prescription mail order program, if available to you. This will allow you to receive a 30 day script to take to the pharmacy and a 90 day script to mail in to your mail order program. Please allow 48 hours for these requests to be processed. All other medications not listed above are considered “regular” refills. These refills must be obtained by calling your pharmacy and having them fax over a refill request form to us at 972-769-0035. There is no charge for these refills. You may leave detailed refill information at 972-769-9000 X 201 or pharmacy@texaschildneurology.com. There is also a medication refill form available on the web site that allows you to fax it back to us, email it, or as a guideline when phoning in your request. Thank You.
